## **Workshop „Empowering of the Young Generation“**

In the last few years a strong wish was growing inside Hiah Park to especially work with young people. To support them developing themselves and to bring them into there power. Because the young generation of today is the societies arrowhead of tomorrow.

Within this workshop there is the possibility to experience and get to know more about ourselves in a way, which is far away from our top-heavy normal daily life, and from which contact to and trust into ourselves can grow.

Central elements of the workshop are spontaneously initiated improvisational movement and perception exercises, which are created out of Hiah Parks shamanic consciousness.
